Objective

Passionate M.Tech Computer Science and Engineering student with a strong interest in Machine Learning and App Developement . Passionate about developing intelligent systems, data-driven models, and deep learning applications. Eager to apply analytical skills and research expertise to solve real-world challenges in AI and ML.

Experience

- **Webgen Technology Solutions** 01/07/2025 - 30/12/2025
  Intern (6 months)
  Software Development Intern – Webgen Tech Solutions
  Worked as a Full Stack intern on the VMDR platform, developing user login modules using React and backend integration. Implemented security-focused features for risk distribution and risk rating analysis while following OWASP guidelines.

Education

Course / Degree	School / University	Grade / Score	Year
Secondary School Certificate (SSLC)	Lakshmi Narayana Vidya Nikethan, Palappuram	81.2%	2020
Higher Secondary Certificate (HSC)	Lakshmi Narayana Vidya Nikethan, Palappuram	76.2%	2022
M.Tech Computer Science and Engineering(Integrated 5 years)	Sri Ramakrishna Engineering College , Coimbatore, Tamil Nadu	8.0	2022-2027

Skills

- Programming Languages: Python, C, JavaScript , HTML, CSS , React.js
- Backend & Full Stack: Node.js, Express, REST APIs
- Databases: MySQL, MongoDB (Basics)
- Data Analysis and Machine Learning
- Soft Skills: Communication, Teamwork, Problem Solving

Projects

- **Credit Card Fraud Detection Using Deep Learning**

  To build adaptive fraud detection models that identify evolving anomalies while minimizing false positives and accurately detecting fraud.
- **Web Traffic Classification Using Deep Learning**

  Successfully developed and implemented a deep learning-based system for classifying HTTP web

traffic.Utilized techniques to analyze traffic patterns and characteristics.

- **Leave Management System For Staffs- App Development**

  Created an app for the ease of college management for managing leaves availed by the staffs. completed the project with RDBMS connectivity and uploaded it in the website .
- **Mobile App Privacy Analyzer (Internship Project)**
  Designed and developed a full-stack application to analyze and visualize privacy risks in mobile apps by evaluating granted permissionsto and Generated actionable privacy recommendations and ensured secure user authentication using JWT, with all analysis data stored safely in a database.

Achievements & Awards

- Certified in Getting started with Artificial intelligence on Jetson Nano
- Data Structures and Algorithm, Programming Foundations using Python, Database Management for Data connectivity and Normalisation - Great learning
- Ceritified in HTML , CSS, Javascript - Udemy
- BEC Certification in Soft skills (87%)
- Certified Essentials Automation Professional – Automation Anywhere
- Project Management in Basecamp: Make a Project Plan – Coursera Project Network
- Career Advancement through C Programming – E-Box Online Certification

Interests

- Data Analysis and Machine Learning
- App Development
- Full Stack Development : Front-End: React
- Building Website prototypes

Activities

- Developed a responsive portfolio website using React.
- Member of college MLSA club (Microsoft Learn Student Ambassador) and Reading Club,SREC.
- Completed AR/VR workshops and online bootcamps to enhance knowledge.
- SREC Hackathon 1.0 (Domestic Applications – Final Pitch Day): Participated in team-based hackathon building innovative solutions.
- Participated in various technical paper presentation events at Sri Ramakrishna Engineering College (SREC) and won several prizes.
